Take the Second Guessing Away

While the addition of a new puppy or kitten to a family comes with a great deal of excitement, it can also be overwhelming. There is food that needs to be purchased, toys, treats, bedding; it is a lot for a new owner to take in.

In the grand scheme of things, it is all worth it. However, the family budget can be tight at times. When your puppy or kitten becomes an adult, they will need yearly maintenance care; as seniors, they will need even more veterinary care.

We at Senoia Animal Hospital understand, which is why we have developed these packages to suit your pet's needs. They include all of the recommended veterinary care for your pet and are budget friendly, with different payment plans available. These packages are meant to help ease your mind and take the guessing out of your pet's care; while keeping the important things, such as preventative care in mind.
