

Dental Disease in Pets: What you don't see can hurt them!!

Do you want to DRAMATICALLY lower your pet's risk for heart, liver and kidney disease? Taking care of your pet's teeth will save you money in the long run avoiding infections and disease; and, it will definitely improve the quality of your pet's life as she ages.

- What about anesthesia free dental cleanings?
- My pet's teeth look fine, but his breath smells. Should I be worried?
- Why does it cost so much for my pet to have dental care than it does for me?
- I should brush my pet's teeth daily, but I forget. Is there any benefit if I brush less often?

February 23, 2016 WORKSHOP – Open to ALL pet owners

(Please leave pets at home.)

Speaker: Dan Murray, DVM
