

# WIDGET Descriptions

## Introduction

You can access your widgets from the *Widgets* page, located under the *Appearance* drop-down menu. Click on one of the position panels on the right-hand side of your screen to open the panel. Drag the widget of your choice from the *Available Widgets* panel and drop it into the position panel you just opened. When you save your widget, it will appear on your WebDVM4 website

**Available Widgets**

Drag widgets from here to a sidebar on the right to activate them. Drag widgets back here to deactivate them and delete their settings.
