

WIDGET Descriptions

Recent Posts

The Recent Posts widget allows you to display the most recent posts from your blog. You can choose to display anywhere from one to five posts at a time. You may also show the date of the post or an excerpt.

The image shows the configuration interface for the 'Recent Posts' widget on the left and the resulting widget output on the right. Blue lines connect the configuration options to their corresponding elements in the widget output.

Widget Configuration:

- Title:** Recent Posts
- Number of items to show:** 3
- ☒ Show date
- ☒ Show excerpt
- [Delete](#) | [Close](#)
- [Save](#)

Widget Output:

RECENT POSTS
