

Recent Testimonials

The Testimonials widget allows you to display testimonials you have added to your Testimonials section. You have the option of displaying between one and five testimonials at a time. You may decide to indicate who authored the testimonial as well.

The image shows the configuration interface for the 'Recent Testimonials' widget. The configuration panel on the left has a title 'Recent Testimonials' and a dropdown arrow. It contains a 'Title:' label with a text input field containing 'Testimonials'. Below this is a 'Number of items to show:' label with a numeric spinner set to '1'. A checkbox labeled 'Show credit' is checked. At the bottom are 'Delete | Close' links and a 'Save' button. A blue line connects the 'Number of items to show' spinner to a text block below. Another blue line connects the 'Show credit' checkbox to a sample testimonial box on the right. The sample box has an orange header and contains the text: '“Thanks for making those great Tech Tip Videos! They were very helpful.”' followed by 'Mr. Smith'.
