Dear valued client;

We wish to inform you of an important modification to your pet's diet.

As part of the ROYAL CANIN® continuous effort to provide the best possible health nutrition to every pet, they have announced some changes to their pet nutrition line.

ROYAL CANIN® has informed us that they will begin international sourcing of the above listed diets.

Diets sourced from France, although the same formulation, will require a recommended transition period for any pet that is regularly eating any of these diets. Certain ingredients sourced from different countries may have slight differences from what our pets are used to.

ROYAL CANIN® diets come in a variety of sizes and formats and continue to offer many benefits for your pet. Please note that packaging look, size and price may differ. Canine Hydrolyzed Protein HP 14kg with change to 12kg, canine Satiety Support 3.5kg will change to 2.5kg and 12kg will change to 11kg.

If you have any questions, please do not hesitate to contact your veterinary team to discuss the best food option for your pet.

A slow transition over a 7-day period is the best way to introduce a pet to a food change.
