

Feline Preventative Healthcare Guidelines

All cats should have a veterinary examination at least annually. For many cats, more frequent visits may be appropriate. Decisions regarding specific frequency of visits should be made based on individual needs of your cat.

Health Evaluation:

Your cats' Health Evaluation is determined from these categories:

- Life style and life stage
- Behavior
- Diet
- Dental assessment
- Pain assessment
- Body and muscle condition scoring

After your pet's doctor completes an evaluation of the above categories he/she will make an assessment of the following:

- Medical Condition
- Infectious and zoonotic diseases
- Parasite prevention and control
- Dental care
- Genetic, breed and age considerations
- Behavior
- Nutrition

Healthcare Plans:

Diagnostic Plan: Every cat should have the following:

- Heartworm testing in accordance with existing guidelines
- Retrovirus testing in accordance with existing guidelines
- At least annual internal parasite testing

Customized plan based on assessment:

- Other diagnostic tests (including dental radiographs)
- Early disease screening tests
- Genetic screening tests

- Therapeutic Plan:** Every cat should receive:
- Year-round broad-spectrum parasite control with efficacy against heartworms, intestinal parasites and fleas
- Customized plan based on assessment:
- Tick control as indicated by assessment
 - Therapeutic recommendations
 - Dental recommendations
 - Behavioral recommendations
 - Environmental enrichment recommendations
 - Dietary and feeding recommendations
- Prevention Plan:** Every cat should have or receive:
- Immunization with core vaccines in accordance with existing guidelines
 - Rabies virus
 - Feline panleukopenia virus
 - Feline herpesvirus-1
 - Calicivirus
 - For kittens, feline leukemia virus (considered non core but highly recommended)
 - Appropriate identification including microchipping
 - Reproductive and genetic counseling and spaying or neutering unless specifically intended for breeding purposes
- Customized plan based on assessment:
- Immunization with non-core vaccines in accordance with existing guidelines
 - Other preventative recommendations and counseling regarding zoonotic diseases
- Follow-up Plan:** Establish a plan for follow-up based on assessment and future care recommendations
Set expectations for next visit
- Customized plan based on assessment:
- Immunization with non-core vaccines in accordance with existing guidelines
 - Other preventative recommendations and counseling regarding zoonotic diseases
- Documentation:** Thorough documentation of the patient visit
