

YOUR PET PRESCRIPTION CHOICES

Your pet is important to us!

We want your pet to get the right medication, at the right dose, to protect your pet's health.

If your pet needs a prescribed medication, you have options for getting it filled.

- In most cases, we can fill it here for you.
- We can provide you with a prescription.

Not all pharmacies are the same.

- Not all pharmacies stock the medications your pet may need.
- Ensure that any pharmacy you use is in good standing with your state board of pharmacy. And while some Internet sites that sell pet drugs can be reputable pharmacies, the FDA warns that other online retailers may appear legitimate but may sell contaminated or otherwise unsafe products.
- No pharmacy should be willing to sell you a prescription drug without taking the prescription your veterinarian ordered, because doing so is both unlawful and dangerous.

Your pet's safety is important.

- Don't let anyone but your veterinarian make changes to the prescription.
- Never give human drugs, including over-the-counter drugs, to your pet unless instructed to do so by your veterinarian.
- If the pharmacist has questions about the prescription, please ask them to contact us.
- Always follow the prescription directions.

Questions or concerns?

- Ask us, we're happy to help.
