Procedure(s) to be performed \_\_\_\_\_

How may we contact you today? Number(s) \_\_\_\_\_ Time(s) \_\_\_\_\_

Advances in anesthesia and surgery have made routine procedures very safe, with a low rate of complications. Nevertheless, occasional problems can arise due to pre-existing conditions not evident during pre-anesthetic physical examinations. To minimize the risk of complications and to establish a baseline of medical data, we recommend blood tests prior to anesthesia and surgery. The type of test(s) recommended will depend on the physical condition of your pet and the nature of the surgery. General recommendations are listed below, and a technician will answer any questions you may have when your pet is checked in for surgery.

- ☐ If performing laparoscopic procedures on my pet, the veterinarian has my permission to convert to the traditional method or procedure if deemed necessary.
- ☐ If my pet is being "spayed" **laparoscopically**, I understand that the surgeon will be removing the ovaries only unless deemed necessary to remove the uterus at the time of surgery.

**Please initial the tests authorized:**

*Fee*

- |   |          |
|---|----------|
| _____ 1) Heartworm test:<br>Recommended for dogs over the age of 5 months and not currently on heartworm prevention.  | \$35.00  |
| _____ 2) Feline Leukemia, Feline Immunosuppressive Virus (FeLV / FIV)<br>Recommended for cats that go outdoors or cats with unknown backgrounds.<br>(includes specimen collection fee)                                | \$50.00  |
| _____ 3) Minor Health Screen / Hemocrit, BUN, Total Protein.<br>Recommended for healthy, young (less than 8 years old) pets.<br>(includes specimen collection fee)  | \$45.00  |
| _____ 4) Complete Blood Count (CBC) / Biochemical Profile.<br>Recommended for senior pets (8 years old and over), and / or systemic disease present<br>and / or extensive surgery. (includes specimen collection fee) | \$134.00 |
| _____ 5) Urinalysis<br>To measure kidney functions. (includes specimen collection fee)  | \$60.00  |

**Other optional procedures:**

- |                                   |         |
|-----------------------------------|---------|
| _____ 6) AVID Microchip Placement | \$45.00 |
| _____ 7) Ear cleaning / flushing  | \$25.00 |
| _____ 8) Nail Trim                | \$12.00 |

I authorize the use of diagnostic procedures and anesthetic agents as deemed necessary for the safety of my pet. I understand that even after performing these tests there is still a slight risk of anesthetic or surgical complications or even death that would be unforeseeable at this time. I acknowledge the procedures have been explained to me and I understand the risks involved with anesthesia and surgery.
