

September is Senior Pet Wellness Month

Did you know our pets are considered seniors at 7 years old? Just like people, your pet's health care needs change as he or she ages. Senior wellness bloodwork is an important component of senior pet care. It promotes early detection and treatment of disease in senior pets and helps maintain health and prevent illness during your pet's golden years. In addition, senior testing establishes normal baseline values for your pet, creating a point of comparison for the future. We want to help you keep your senior happy and healthy, so we are offering special discounts on senior wellness bloodwork and senior products all September long!

If you want to schedule a senior check-up or senior bloodwork for your pet, call us at (856) 740-3700!

**Special discounts will be available throughout
