ADMISSION CHECKLIST

Below are services we recommend to keep your pet healthy. Please let us know if you would like us to perform any of these services today.

CANINE	FELINE
Heartworm test for \$25.00? YES NO Heartworm disease is spread by mosquitoes and can cause serious damage to the heart. Prevention costs are very small compared to heartworm treatment which can run \$1,000+. Consider testing and putting your dog on prevention!	FeLV/FIV test for \$35.00? YES NO If negative, FeLV vaccination for \$20.50? YES NO <ul style="list-style-type: none"> FeLV vaccine and one booster is recommended for all cats and kittens; further vaccination depends on lifestyle
Heartworm prevention? YES NO Type _____	Heartworm prevention? YES NO Type _____
Flea/tick medication? YES NO Type _____	Flea/tick medication? YES NO Type _____
Microchip for \$25.00? YES NO Microchips contain a number that links to your name and phone number so that you can be located if your pet is lost.	Microchip for \$25.00? YES NO Microchips contain a number that links to your name and phone number so that you can be located if your pet is lost.
Pain medication for \$15.00? YES NO 3 days of pain medication can help lessen the muscle soreness and inflammation from the surgery while your pet recovers.	Pain medication will be given here and will last up to 48 hours.
Ear hair plucking for \$10.00 if needed? YES NO Ear cleaning for \$20.00 if needed? YES NO Excessive amounts of ear hair can result in the ear canal not being able to dry out properly which can lead to infections. Doing this while they are under anesthesia means that there is no pain for your pet.	Earmite Treatment for \$18.50 if needed? YES NO Ear mites can cause head shaking and extreme itchiness. If debris is seen in the ear canals, it's best to check for them and have the medication applied while they are under anesthesia.
If deciduous (baby) teeth are retained, okay to extract them? YES NO Leaving these teeth in can lead to crowding in the mouth and tartar to build up between the teeth. This could lead to the premature loss of teeth in the future.	If deciduous (baby) teeth are retained, okay to extract them? YES NO Leaving these teeth in can lead to crowding in the mouth and tartar to build up between the teeth. This could lead to the premature loss of teeth in the future
If umbilical hernia is noted at the time of surgery, okay to repair? YES NO Depending on the size of the hernia, a piece of intestine could become entrapped in the hole leading to the need for emergency surgery.	If umbilical hernia is noted at the time of surgery, okay to repair? YES NO Depending on the size of the hernia, a piece of intestine could become entrapped in the hole leading to the need for emergency surgery.
If tapeworms are seen at the time of surgery, okay to treat? YES NO	If tapeworms are seen at the time of surgery, okay to treat? YES NO
If fleas are seen at the time of surgery, a Capstar will be given. Would you like to also have a dose of flea prevention applied? YES NO	If fleas are seen at the time of surgery, a Capstar will be given. Would you like to also have a dose of flea prevention applied? YES NO
If here for Dental, ok extractions? YES NO Price range \$10.00-\$30.00	If here for Dental, ok extractions? YES NO Price range \$10.00-\$30.00
