Dental Health Month

February is Dental Health Month!

Good oral health is more than just a pretty smile.

Poor dental hygiene can put both your pet's health and your pocketbook at risk. Bad breath can be a sign of untreated dental conditions. If left untreated, you may put your pet at risk for greater problems such as oral pain, periodontitis, kidney or liver infection, and heart disease.

Even if your pet's breath smells fine, there still could be dental conditions that are hard to spot without a complete veterinary exam and oral x-rays. Dental x-rays taken during a prophylactic cleaning can uncover conditions below the gum line for a complete picture of oral health.

In honor of Dental Health Month we have several great promotions for all Dentals scheduled in the month of February:

Level 1 Dental \$25 off

Level 2 Dental \$50 off

Level 3 Dental \$75 off

Level 4 Dental \$100 off

Make an appointment for an exam today so that we may schedule your pet's dental in February!
