

Client's Name

Kensington Bird and Animal Hospital

977 Farmington Avenue • Kensington, CT 06037 (860) 828-7736 www.kbahonline.com

Pet's Name

Waiver of Responsibility and Liability for Prescriptions to be Filled by Outside International	net
Pharmacies Not Associated with this Hospital	

Signature of Client/Owner or Authorized Agent Date
Signature of Client/Overser on Authorized Agent
I have read and understand the above risks in using an outside internet pharmacy that is not associated with this veterinary hospital.
5. The prescription and/or its refills may not arrive in a timely fashion, thus potentially causing an interruption in treatment for my pet, which may result in the need for additional testing prior to the continued safe use of the product.
4. Product warranties for prescriptions obtained from outside internet pharmacies may be different than the manufacturer's normal warranties or potentially unavailable. It is understood that my veterinarian is unable to offer warranties for products or prescriptions obtained through outside sources.
3. Purchases from outside on-line pharmacies may not appear in my pet's medical records provided by my veterinarian. This information may be important in the event that my pet needs additional medications and/or treatment from my veterinarian.
2. The prescribing instructions for products purchased from other sources may be different from those recommended by my veterinarian. This could result in improper dosing of my pet.
1. There is no way for my veterinarian to know if the product has been stored properly while in transit, is out of date, repackaged or counterfeit when purchased from and outside internet source. This has occurred in the past. For more information on this, visit the FDA website at www.fda.gov .
Risks involved in purchasing pharmaceuticals or food products for my pet over the internet:
I hereby request a prescription for medication(s) for my pet so that I can purchase these products from an outside internet pharmacy not associated with this hospital. By signing this waver, I acknowledge that I have been properly informed of the risks involved in doing so, and accept any and all responsibility, financial or otherwise, that may occur from this decision. I understand that this hospital will be held harmless from the use of products and/or prescriptions purchased from sources outside of the hospital's monitoring and control.

Purchasing Pet Drugs Online: Buyer Beware

iscount pet drugs—
no prescription
required" may appeal
to pet owners surfing the Web,
but FDA experts say it can be
risky to buy drugs online from
sites that tout this message
and others like it.

Some of the Internet sites that sell pet drugs represent legitimate, reputable pharmacies, says Martine Hartogensis, D.V.M., deputy director of the Office of Surveillance and Compliance in FDA's Center for Veterinary Medicine (CVM). But others are fronts for unscrupulous businesses operating against the law.

FDA has found companies that sell unapproved pet drugs and counterfeit pet products, make fraudulent claims, dispense prescription drugs without requiring a prescription, and sell expired drugs.

Pet owners who purchase drugs from these companies may think they are saving money, says Hartogensis, but in reality, they may be short-changing their pet's health and putting its life at risk.

CVM regulates the manufacture and distribution of animal drugs, while individual state pharmacy boards regulate the dispensing of prescription veterinary products.

Red Flags

Some foreign Internet pharmacies advertise that veterinary prescription

When ordering online

- Order from a Web site that belongs to a Vet-VIPPS accredited pharmacy.
- 2. Mail the prescription provided by your veterinarian to the pharmacy after your pet receives a physical examination.
- 3. Order from an outsourced prescription management service that your veterinarian uses.

A veterinarian should physically examine an animal prior to making a diagnosis to determine the appropriate therapy.

drugs are available to U.S. citizens without a prescription. But, says Hartogensis, "There is a risk of the drugs not being FDA-approved."

A foreign or domestic pharmacy may claim that one of its veterinarians on staff will "evaluate" the pet after looking over a form filled out by the pet owner, and then prescribe the drug. "A veterinarian should physically examine an animal prior to making a diagnosis to determine the appropriate therapy," says Hartogensis.

CVM is especially concerned that pet owners are going online to buy two types of commonly used prescription veterinary drugs—nonsteroidal anti-inflammatory drugs (NSAIDs) and heartworm preventives.

"Both drugs can be dangerous if there is no professional involvement," says Hartogensis. "It's not generally a concern if the owner uses a legitimate online pharmacy and mails in a prescription from their veterinarian, who is monitoring the animal. But if there is no veterinarian—client—patient relationship, it's a dangerous practice."

NSAIDS and Heartworm Preventives

Veterinarians often prescribe NSAIDs to relieve pain in dogs. NSAIDs should not be purchased on the Internet without a veterinarian's involvement because

- dogs should undergo blood testing and a thorough physical examination before starting NSAIDs
- dogs should be monitored by a veterinarian while they are taking NSAIDs
- veterinarians should discuss possible side effects of NSAIDs with the owner

 the prescription should be accompanied by a Client Information Sheet that explains important safety information to the owner

Heartworm disease is a potentially fatal condition transmitted by the bite of a mosquito that is carrying infected larvae of the heartworm parasite. Dogs, cats, and ferrets can get heartworm. Heartworm preventives, given daily, monthly, or semiannually depending on the product, kill the larvae before they become adult worms.

The American Heartworm Society recommends

- using heartworm medication for dogs year-round, no matter where you live in the United States
- getting dogs tested yearly to make sure they're not infected with heartworm

"Testing is important even in dogs regularly treated with heartworm preventive products due to the occasional reports of product ineffectiveness," says Hartogensis. An Internet pharmacy veterinarian cannot draw blood from the animal to perform the test. If the test isn't done, a pet owner could be giving heartworm preventives to a dog that has heartworms, potentially leading to severe reactions.

Tips for Buying Pet Drugs Online

 Order from a Web site that belongs to a Vet-VIPPS accredited pharmacy.
 Vet-VIPPS—the Veterinary-Verified Internet Pharmacy Practice Sites—is a voluntary accreditation program of the National Association of Boards of Pharmacy (NABP). NABP gives the

Vet-VIPPS seal to online pharmacies that dispense prescription animal drugs and comply with NABP's strict criteria, including federal and state licensing and inspection requirements, protecting patient confidentiality, quality assurance, and validity of prescription orders. Look for the Vet-VIPPS seal displayed on a pharmacy's Web site or check with NABP at www.nabp.net (click on "Accreditation Programs") to find out if a pharmacy is Vet-VIPPS accredited. Because this is a new program, begun in 2009, a small number of pharmacies are currently Vet-VIPPS accredited.

 Order from an outsourced prescription management service that your veterinarian uses.

These state-licensed Internet pharmacy services work directly with the veterinarian, require that a prescription be written by the veterinarian, and support the veterinarian-client-patient relationship. Ask your veterinary hospital if it uses an Internet pharmacy service.
